1 [Data security and protection: Winnowing: local algorithms for document fingerprinting](#)

Saul Schleimer, Daniel S. Wilkerson, Alex Aiken

 June 2003 **Proceedings of the 2003 ACM SIGMOD international conference on Management of data SIGMOD '03**

Publisher: ACM Press

 Full text available: [pdf\(180.16 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Digital content is for copying: quotation, revision, plagiarism, and file sharing all create copies. Document fingerprinting is concerned with accurately identifying copying, including small partial copies, within large sets of documents. We introduce the class of *local* document fingerprinting algorithms, which seems to capture an essential property of any finger-printing technique guaranteed to detect copies. We prove a novel lower bound on the performance of any local algorithm. We also ...

2 [Database theory, technology, and applications \(DTTA\): Fingerprinting relational databases](#)

Fei Guo, Jianmin Wang, Deyi Li

 April 2006 **Proceedings of the 2006 ACM symposium on Applied computing SAC '06**

Publisher: ACM Press

 Full text available: [pdf\(165.18 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In this paper, we propose a fingerprinting solution to protect valuable numeric relational data from illegal duplications and redistributions. We introduce a twice-embedding scheme. In the first embedding process, we embed a unique fingerprint to identify each recipient to whom the relational data is distributed. The embedding process is controlled by a secret key. Meanwhile, the fingerprint can be detected using the same secret key to prove ownership at a numerical confidence level. The second ...

1 [Improving duplicate elimination in storage systems](#)

Deepak R. Bobbarjung, Suresh Jagannathan, Cezary Dubnicki

 November 2006 **ACM Transactions on Storage (TOS)**, Volume 2 Issue 4

Publisher: ACM Press

 Full text available: pdf(481.90 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Minimizing the amount of data that must be stored and managed is a key goal for any storage architecture that purports to be scalable. One way to achieve this goal is to avoid maintaining duplicate copies of the same data. Eliminating redundant data at the source by not writing data which has already been stored not only reduces storage overheads, but can also improve bandwidth utilization. For these reasons, in the face of today's exponentially growing data volumes, redundant data elimination t ...

2 [Collaboration and group work: Collaborative extensions for the UpLib system](#)

William C. Janssen

 June 2004 **Proceedings of the 4th ACM/IEEE-CS joint conference on Digital libraries JCDL '04**

Publisher: ACM Press

 Full text available: pdf(148.62 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The UpLib personal digital library system is specifically designed for secure use by a single individual. However, collaborative operation of multiple UpLib repositories is still possible. This paper describes two mechanisms that have been added to UpLib to facilitate community building around individual document collections.

Keywords: collaboration, extension sharing, metadata sharing, personal digital library

August 2005 **Proceeding of the eleventh ACM SIGKDD international conference on Knowledge discovery in data mining KDD '05**

Publisher: ACM Press

Full text available: pdf(832.54 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Hewlett-Packard has many millions of technical support documents in a variety of collections. As part of content management, such collections are periodically merged and groomed. In the process, it becomes important to identify and weed out support documents that are largely duplicates of newer versions. Doing so improves the quality of the collection, eliminates chaff from search results, and improves customer satisfaction. The technical challenge is that through workflow and human processes, th ...

1 [1st international workshop on advanced data processing in ubiquitous computing](#)

[\(ADPUC 2006\): Alchemist: user driven searching in ubiquitous networks](#)

Matthew Shields, Ian Taylor

November 2006

Proceedings of the 1st international workshop on Advanced data processing in ubiquitous computing (ADPUC 2006) ADPUC '06
Publisher: ACM Press

 Full text available: [pdf\(237.79 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This paper describes a generic peer-to-peer architecture, called Alchemist, which provides a peer-to-peer overlay coupled with a data fusion workflow environment for the searching or discovery of distributed resources. The Alchemist is designed to be generic and can host a number of different peer-to-peer applications or other frameworks. We provide an example of how it can be applied to audio and visual searching by using the underlying toolkit to provide workflows for the manipulation of diffe ...

2 [Aurora: a new model and architecture for data stream management](#)

Daniel J. Abadi, Don Carney, Ugur Çetintemel, Mitch Cherniack, Christian Convey, Sangdon Lee, Michael Stonebraker, Nesime Tatbul, Stan Zdonik

 August 2003 **The VLDB Journal — The International Journal on Very Large Data**
Bases, Volume 12 Issue 2

Publisher: Springer-Verlag New York, Inc.

 Full text available: [pdf\(585.97 KB\)](#) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

Abstract. This paper describes the basic processing model and architecture of Aurora, a new system to manage data streams for monitoring applications. Monitoring applications differ substantially from conventional business data processing. The fact that a software system must process and react to continual inputs from many sources (e.g., sensors) rather than from human operators requires one to rethink the fundamental architecture of a DBMS for this application area. In this paper, we present Aur ...

[AbstractPlus](#) | Full Text: [PDF\(248 KB\)](#) IEEE CNF
[Rights and Permissions](#)

- ☐ **19. High-speed and memory efficient TCP stream scanning using FPGA**
Sugawara, Y.; Inaba, M.; Hiraki, K.;
[Field Programmable Logic and Applications, 2005. International Conference on](#)
24-26 Aug. 2005 Page(s):45 - 50
Digital Object Identifier 10.1109/FPL.2005.1515697

[AbstractPlus](#) | Full Text: [PDF\(210 KB\)](#) IEEE CNF

[Rights and Permissions](#)

- ☐ **20. Promotional and commercial content distribution based on a legal and tr framework**
Schmucker, M.; Ebinger, P.;
[E-Commerce Technology, 2005. CEC 2005. Seventh IEEE International Confe](#)
19-22 July 2005 Page(s):439 - 442
Digital Object Identifier 10.1109/ICECT.2005.71
[AbstractPlus](#) | Full Text: [PDF](#)(128 KB) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **21. A wavelet-based public key image authentication watermarking**
Chien-Chang Chen; Kang-Chih Fan; Sheng-Wen Wang;
[Security Technology, 2003. Proceedings. IEEE 37th Annual 2003 International Conference on](#)
14-16 Oct. 2003 Page(s):321 - 324
Digital Object Identifier 10.1109/CCST.2003.1297579
[AbstractPlus](#) | Full Text: [PDF](#)(1395 KB) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **22. A Fingerprinting System for Musical Content**
Ghouti, L.; Bouridane, A.; Ibrahim, M.K.;
[Multimedia and Expo, 2006 IEEE International Conference on](#)
July 2006 Page(s):1989 - 1992
Digital Object Identifier 10.1109/ICME.2006.262949
[AbstractPlus](#) | Full Text: [PDF](#)(212 KB) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **23. Biometric hash: high-confidence face recognition**
Ngo, D.C.L.; Teoh, A.B.J.; Goh, A.;
[Circuits and Systems for Video Technology, IEEE Transactions on](#)
Volume 16, Issue 6, June 2006 Page(s):771 - 775
Digital Object Identifier 10.1109/TCSVT.2006.873780
[AbstractPlus](#) | Full Text: [PDF](#)(280 KB) [IEEE JNL](#)
[Rights and Permissions](#)

- ☐ **24. Mathematical formulation for the secure and versatile integration of biom cryptographic framework**
Goh, A.; Ngo, D.C.;
[Information and Communication Technologies: From Theory to Applications, 2 Proceedings. 2004 International Conference on](#)
19-23 April 2004 Page(s):411 - 412
Digital Object Identifier 10.1109/ICTTA.2004.1307806
[AbstractPlus](#) | Full Text: [PDF](#)(301 KB) [IEEE CNF](#)
[Rights and Permissions](#)

- ☐ **25. Generalized hashing and applications to digital fingerprinting**
Alon, N.; Cohen, G.; Krivelevich, M.; Litsyn, S.;
[Information Theory, 2002. Proceedings. 2002 IEEE International Symposium c](#)
2002 Page(s):436
Digital Object Identifier 10.1109/ISIT.2002.1023708
[AbstractPlus](#) | Full Text: [PDF](#)(219 KB) [IEEE CNF](#)
